Abstract (en)  
[origin: WO0146042A2] A lid (14) for fitting to an open-topped refuse container (10) has a compacting mechanism comprising a compacting plate (36) mounted under the lid, a telescopically adjustable actuating rod (42) mounted over the lid, and means (40) slidably coupling the plate to the rod through an aperture in the lid such that the rod may be manoeuvred from a storage position wherein the rod lies across the lid and the plate is drawn up under the lid to an operative position wherein the rod stands upright over the aperture and may be pushed downwardly through the aperture (as seen in the figure) to push the plate down into the container.
