Abstract (en)
[origin: WO0144397A1] The invention relates to a transfer adhesive tape, which comprises a non-adhesive support tape and at least one layer of pressure-sensitive adhesive material, applied to the support tape and which may be detached from said support tape. The transfer adhesive tape is in rolled form and the layer of pressure-sensitive adhesive material is non-continuous. During use a clean separation of the layer of adhesive, attached to the substrate, from the layer remaining on the support tape is achieved.
