Abstract (en)

[origin: WO0116816A2] A data processing system comprises means for keeping a common agenda by parties to the data processing system, means for updating the common agenda by any of the parties, and means for communicating at least an update for the common agenda to the other parties possibly in response on an update by any of the parties. Advantageously all parties in the data processing system have the disposition of an updated agenda at all times.
