Abstract (en)
[origin: DE10118612A1] The tray (1) can receive goblets (50) so that pressure is exerted on the top of the foot (51) of the goblet, leaving anything written on the goblet readable. This is achieved by providing grips (13, 15) to engage at least partly with the foot of an inserted goblet. The grips may be in the form of opposite sprung tabs under which the foot of the goblet can be inserted.
