Abstract (en)

[origin: EP1251097A1] The device has a drum body (14) for an electric cable (16) rotatably mounted on a bearer structure (12), a spring drive (18) tensioned by unwinding the cable and a reversing mechanism with a groove labyrinth (34) and control element (38). At least one stop part (42) is formed on the drum flange and the control element has a thrust surface arranged at a distance from an engagement element that butts against the stop part in the stop position.
