Abstract (en)

A method for fixing insulating material to a building wall or to ready-made wall elements involves application of a hardenable fixing material in the form of a reactive foamable material of one or more components. <??>A method for fixing insulating material (16) to a building wall (10) or to ready-made wall elements involves application of a hardenable fixing material (12) in the form of a reactive foamable material of one or more components. <??>Independent claims are also disclosed for: <??>(1) a building facade with insulating material fixed by the proposed method; and <??>(2) an apparatus for application of a reactive foamable fixing material of one or more components. The apparatus comprises an applicator unit allowing several parallel beads of the fixing material to be applied at the same time.

Abstract (de)

Die Befestigung für Dämmmaterial an einer Gebäudewand oder an Gebäudewand-Fertigbauteilen ist versehen mit einem aushärtbaren Befestigungsmaterial. Dieses Befestigungsmaterial ist ein aufschäumbares Material. <IMAGE>
