Abstract (en)

[origin: EP1251233A1] The frame extrusions (1, 2) are made from bronze, have a rectangular U-shaped cross-section with parallel sides (4), and are designed to be joined together edge to edge by welds (9) along their inner surfaces. The welds are made with a mainly copper-based or copper-aluminium material, using a MIG-type welder with a neutral gas such as argon.
