Abstract (en)
[origin: EP1251413A1] A multifunction electronic watch 10 having a large variety of added functions a configuration enabling separate use of an energy-saving mode and a function information operating mode, the watch having a reference signal generation means 1, a time information generation means 2, which generates time information TJ based on a reference signal S3R from the reference signal generation means 1, a function information generation means for generating function information FJ, a display drive means 4, which outputs drive signals DRT and DRF for the purpose of displaying the function information FJ and the time information TJ on an appropriate display means, and a display means 5, which displays the function information FJ and the time information TJ based on the drive signals DRT and DRF from the display drive means 4. In the energy-saving operating condition the electronic watch has a power consumption that is less than a normal operating condition, wherein the function operating condition of the function information generation means is given priority over the energy-saving operating condition. <IMAGE>
