Abstract (en)

[origin: WO0147382A1] The invention relates to protective clothes consisting of a microfilament nonwoven fabric having a weight of 60 to 300 g/m<sup>2</sup> and having a resistance to tearing of > 150 N. The nonwoven fabric consists of melt-spun and drafted endless filaments that consist of several components and are directly placed to form a nonwoven, whereby the titre amounts to 1.5 to 5 dtex. After optional pre-bonding, at least 80 % of the endless filaments that consist of several components are split to form micro-endless filaments having a titre of 0.1 to 0.8 dtex and are bonded.
