Abstract (en)
[origin: WO0144609A1] A door assembly (10) comprises a door (12) hingedly mounted on a frame (14). The assembly includes a door stop mechanism (18) acting between the rear edge (23) of the door and the adjacent frame member, for holding the door in a predetermined open position. The stop mechanism (18) comprises a hook (30) mounted on the door and engageable with a spigot (38) mounted on the frame. When the door is closed, the door stop mechanism (18) is substantially concealed from view. The spigot (38) is received in a recess (42) to act as a security dead-bolt. The door stop mechanism (18) may also be released automatically in the event of fire.
