Abstract (en)  
[origin: WO0157464A1] A generally circular base (20) supports a toy figure (11) upon a pivotally supported plate (21). The toy figure further holds a launcher housing (30) within which a disk launching mechanism (10) is operative to launch a stream of toy disk objects (18). The launcher mechanism further includes a gear drive mechanism (42, 44) which operates upon the base and pivotally supported plate to oscillate the toy figure and its disk launcher from side-to-side as disks are sprayed outwardly.
