Abstract (en)
[origin: WO0139290A2] A method of producing a layer of lithiated material is provided wherein a mixture of Li(acac) and Co (acac)₃ is dissolved in an aqueous solvent to produce a solution. The solution is deposited upon a substrate by atomizing the solution, passing the atomized solution into a heated gas stream so as to vaporize the solution, and directing the vaporized solution onto a substrate.
