## Abstract (en)

[origin: FR2823726A1] Assembly for packaging and applying a product, especially a cosmetic or care product, includes an applicator with a distal portion that is more compressible than its proximal portion. Assembly, comprises: a first housing (20) containing the product; a second housing (30) that is in communication with the first housing and is adapted to receive a removable applicator; a removable closure (50) for the second housing; and an applicator (40) comprising proximal and distal portions with respect to the application surface, the distal portion (41) being more compressible than the proximal portion (49).

## Abstract (fr)

La présente invention concerne un ensemble (10) pour le conditionnement et l'application d'un produit (P), notamment cosmétique ou de soin, comprenant un premier logement (20) contenant le produit à distribuer, et un second logement (30) en communication sélective ou permanente avec le premier logement (20), le second logement (30) étant destiné à recevoir de manière amovible un organe d'application (40), un élément de fermeture amovible (50) obturant de manière sensiblement étanche une ouverture (31) délimitée par un bord du second logement (30), l'organe d'application (40) comportant une première portion (49) adjacente à une surface d'application (44) et au moins une seconde portion (41; 42) séparée de la surface d'application (44) par la première portion (49), ladite seconde portion (41; 42) étant de compressibilité supérieure à la compressibilité de la première. <IMAGE>
