Abstract (en)

[origin: EP1253096A1] Office printer or fax machine has a paper feeder with two paper trays (1, 3) for two different parts of the machine and means for selecting sheets from each tray with selection rollers (7, 8, 10) mounted on a shaft (9) with means for rotating the shaft. Means for driving the shaft are such that it can be rotated in either sense. The shaft is common to paper selection for both trays and has at least two free-wheeling rollers that rotate with the shaft in opposite directions.
