Abstract (en)
[origin: EP1253243A2] The method for assembling railway points uses the same sleepers (4) and bedding plates (3) for points with different widths of frog (9) and guard rail gap. The guard rail gap is adjusted by welding the guard rail supports to the bedding plates at different positions, while the frog gap (a) is adjusted by working the inner side of the heads of the wing rails (10, 11).
