Abstract (en)  
[origin: CA2395822A1] A male genital sheath primarily for alleviating despair and unhappiness due to physical defects of the sex organs is provided with means for physically stimulating the sex partner during coitus. The sheath is generally made of a n elastomeric material, including a closed tip, an open end, and elongated mai n body and a thickened first collar member which is adapted to be received within the sex organ of the partner during coitus and to provide additional physical stimulation.
