Abstract (en)
[origin: US7198186B2] A support frame for a respiratory air container that can be adjusted to the torso length of a user. The support frame has a support plate with shoulder straps and to which at least one respiratory air container is fastened and from which pneumatic and electric supply lines originate. An extension plate is provided on the support plate and can be moved in a longitudinal direction and locked into various positions with supply lines attached to it. Shoulder straps can be fastened to a support free end of the extension plate.
