Abstract (en)

[origin: WO0158857A1] The invention relates to a method for producing alkoxy malonic acid dinitriles of general formula (I), wherein R<1> means C1-6-alkyl or halogen-substituted C1-6-alkyl. The method is characterised in that the corresponding alkoxy malonic acid diamides of general formula (II), wherein R<1> has the aforementioned meaning, are converted by means of a dehydrating agent. The invention also relates to the intermediate products of general formula (III), whereby said products are formed during dehydration.
