Abstract (en)
[origin: WO0157630A2] The invention relates to a portable computer comprising a basic enclosure (1) and a display (2) which is fastened to the basic enclosure (1) by means of a display fastening means (3), whereby the basic enclosure (1) comprises a propping device, for example, a strut (5), a pivotal plate (6) or a rotational plate (8). These elements serve to prop up the basic enclosure (1) with a propping angle (α) that ranges from 30 DEG to 90 DEG with regard to a propping plane (7). This permits the display (2) to be placed in a position that is elevated with regard to the propping surface (7).
