Abstract (en)  
[origin: WO0154071A2] A system for printing postal indicia. The system includes at least one postal security device connected to a data center and a customer host associated with a respective postal security device connected to the data center. The postal security device is adapted to provide secure data to be included in the postal indicia and the customer host is adapted to request the postal indicia from the data center and print the postal indicia including the generated data.  
[origin: WO0154071A2] A system for printing postal indicia. The system includes at least one postal security device (22) which is linked to a customer host (24); where both the security device (22) and customer host (24) are connected to a data center (20).
