Abstract (en)
[origin: WO0159711A1] The invention relates to a system for automatically charging fees when predetermined positions are passed. Said system comprises at least one communication device (4) for dedicated short range communication (DSRC) that is intended for an at least temporary local placement, and at least one mobile communication unit (7) for dedicated short range communication. The dedicated short range communication device (4) that is intended for the local placement is equipped to transmit information identifying itself and at least indirectly its position to the mobile DSRC communication unit (7).
