Abstract (en)

[origin: WO0160093A1] A system for incorporating legacy private branch exchange (PBX) features in a wireless network includes a base station (24) operable to communicate with a mobile station (12) over a wireless interface (48). The system also includes a gateway (34) coupled to the base station (24) and to the PBX (18) for instantiating the mobile station (12) to appear as a subscriber line to the PBX (18).
