Abstract (en)

The purpose of this Patent is a "System for fastening bathroom accessories", the use of which is explained in the description of this invention. Its structure consists of: A back part (1) for fastening to the wall, from the front face of which project a squared section prism (2). A decorative body (5) with an ellipsoidal surface, inside which there is a housing (6) for the prism (2) and a screwed orifice (8) for the prisoner screw (9) to pass through on joining with the part (1), as well as an axial tubular prolongation (10) on its polar zone. A T-shaped tubular part (1) the central branch of which is housed in the tubular prolongation (10), fastening both parts with a screw (12). Two elastic caps (13) with an end that has straight grooves (14) that form flaps (15), with thicknesses (16) that fit into perimetral necks (17) on the ends of the rods (18) intended to support the accessories. <IMAGE>
