Abstract (en)
[origin: FR2823759A1] Solid product for the destruction of carbon deposits, e.g. soot, comprises a compressed aggregate of a particulate cellulosic solid and powder or crystals of a chemical destructive agent. The proportion of cellulosic substance is at least 30% and that of the chemical agent is at least 20%. Independent claims are also included for; (1) A method of preparation of the above product; and (2) A method of using the above product.
