Abstract (en)

[origin: EP1254980A1] Transparent or semi-transparent yarns and dyed yarns are used in combination as composition yarns of a ribbon or belt to be woven or knitted. Consequently, color of the dyed yarns can be seen through the transparent yarns at intersections of both yarns. Further, the belt having a specific color tone produced by mixing various colors may be obtained. If it is intended to change the color of the belt, the belt having a desired color can be produced easily only by changing part of the composition yarns. <IMAGE> <IMAGE>
