Abstract (en)

Apparatus and method of locating window boards (22) in the required position with regard to a corresponding window frame (18) and securing same to an interior wall (12) characterised by the providing a window board (22) being formed with location means (26), providing fixing means (28) which are adapted to be received in the location means (26) and locating said fixing means (28) in position within the location means (26). The fixing means (28) is then bent or flexed into the internal wall (12) and fixed thereto through the pre-drilled holes in the fixing means (28). <IMAGE>
