Abstract (en)

[origin: WO0149256A2] Oil-free cosmetic or dermatological emulsions containing an aqueous phase and at least one other liquid UV filter substance phase at room temperature. The difference in density between the UV filter phase and the aqueous phase (which can be determined with a DMA 45 type calculating digital densitometer from the Chempro/PA company at a temperature of 25 DEG ) does not exceed 0.01 g•cm<-3> The invention also relates to a method for the production of said oil-free emulsions.
