Abstract (en)
[origin: WO0160096A1] A system [10] for transferring data between a communication device [14] and a data storage device (16) includes a cellular communication network (12) which can communicate with the communication device (14) and the data storage device (16), and a computer programme for providing an interface between data stored in the communication device (14) and the data storage device [16] so that data stored in the communication device (14) can be downloaded onto the data storage device (16) and retrieved from the data storage device (16) via the cellular communication network (12).
