Abstract (en)
[origin: EP1256297A2] Indicator of products for shelving, particularly for shelving holding products in sales areas or shopping outlets. It comprises a semi-rigid strip or band, preferably based on a thermoplastic laminate, which has three transversal folding lines, one central (1) and two intermediate (2) symmetric with respect to said central line, these three lines defining two identical intermediate areas (3), capable of being situated back to back on folding the strip along the transversal central line (1), and two outer areas (4), which are situated in a coplanar position, when folded outwards at a right angle, along the intermediate folding lines, with respect to the adjacent intermediate area. <IMAGE>
