Abstract (en)
[origin: EP1256308A2] The dishwashing machines comprises a built-in garbage shredder (10) that has a rotor (11) adapted to selectively rotate in the two opposite directions as driven by a bi-directional electric motor (18), which is controlled by sensors (19) adapted to cause the rotor to reverse the direction of rotation thereof when the resisting torque applied to the same rotor is detected to exceed a pre-determined threshold value.
