Abstract (en)
A cutlery basket for dishwasher includes a containing body (S) of parallelepiped shape open at the top in which there are inserted two mobile partitions (M, M') provided at the bottom end with lateral pins (P) which slide in guide slots (G) formed in the sides of the container (S), at the top end with lateral teeth (N) and at mid-height with recesses (R) orthogonal to the plane of the mobile partition (M, M'), the teeth (N) being insertible into corresponding vertical seats (V) formed in the top edge (E) of the container (S) while the recesses (R) are shaped to fit over the edge (E). The mobile partitions (M, M') are provided with holes (A) sized for inserting the handles of cutlery and/or the blades of knives and since they can be arranged horizontally even cantilevered outside the edge (E) they allow to increase the basket capacity. <IMAGE>
