Abstract (en)
[origin: EP1256659A2] An impact absorber roller, formed by a hollow roller surrounding a post (1), the post supporting a rail along a road and the absorber roller consisting of a rigid, internal cylinder (2) able to rotate around the post (1) and an external cylinder of a larger diameter, made of a soft, bumping material in order to withstand an impact of a car or a person's body projected against said rail (5) for alleviating possible damage.
