Abstract (en)

[origin: EP1256681A1] At least one part (3,4) of the fitting is adjustably fixed in relation to the closure element and has at least one attachment (2) gripping behind a back-tapered groove (15), with a pressure screw (6) fitting into a continuously threaded hole. The attachment is pressed against a groove-wall facing away from the closure element. The screw's end is supported against the closure element. The fitment in the form of a hinge (11) has a sleeve with pin-shaped counter-fitment (5).
