Abstract (en)

A cable clamping device (1) including a base (2) having a seat (3) through which one or more electric cables (4), e.g. supply cables of an electric household appliance, are housed; and a clamping member (5), which is insertable inside the base, crosswise to the seat, through a mouth (6) formed in the base and directly facing the seat, to clamp the cables against a bottom wall (7) of the seat; the clamping member (5) being secured to the base (2) by at least one screw, and by a jack device (18) including a rib (20) having transverse teeth (21) and formed in one piece with the clamping member (5) on the opposite side to a hole (24) for receiving the at least one screw (25), and a recess (22) formed in the base, alongside the seat, to receive the whole length of the rib (20), and having, internally, at least one elastically deformable tooth (23) located so as to click onto the transverse teeth. <IMAGE>
