Abstract (en)

[origin: EP1257018A1] The device has a housing (11) with several different protruding plug systems (12,14) on its periphery and a plug can (17) rotatably mounted in the housing and with electrical contacts that can be connected to corresponding contacts of the various plug systems in rotary positions of the plug can associated with the external plug systems. At least one of the plug systems has a protective contact pin (30,42) movably mounted in the housing.
