Abstract (en)

[origin: WO0160278A2] This invention relates to an oral therapeutic delivery appliance. By using this oral therapeutic delivery appliance medicaments may be delivered to oral soft tissues, where medicaments are easily absorbed. To aid the delivery of medicaments to oral soft tissues the oral therapeutic delivery appliance contains a therapeutic pooling reservoir where the medicaments may be placed. The oral therapeutic delivery appliance may be used to treat or aide in the treatment of various oral maladies such as periodontal disease (i.e., gum disease) as well as treating or aiding the treatment of other physical ailments and systemic diseases (e.g., diabetes and other chronic diseases which require either single, intermittent or constant dosing of medicament).
