Abstract (en)
[origin: WO0130437A1] A patient-shielding and coil system, including a coil wire (12, 14) electrically coupled to a source of electrical current, an electrically conductive surface (76), insulation material (74) between the coil wire (12, 14) and the conductive surface (76), and a drain wire (42) connected to the conductive surface (76) and forming a capacitive current loop with respect to the source.
[origin: WO0130437A1] A patient-shielding and coil system, including a coil wire (44) electrically coupled to a source of electrical current, an electrically conductive surface (52), insulation material (74) between the coil wire (44) and the conductive surface (52), and a drain wire (42) connected to the conductive surface (52) and forming a capacitive current loop with respect to the source.
