Abstract (en)
[origin: WO0158651A1] A roller for a cheese cutter having a handle, a rod extending from the handle, and a string arranged alongside the rod. A gap of free space is present between the roller and the end of the rod so as to allow a nut positioned at the end of the rod to be screwed towards the handle in order to allow for exchange of the string, even when the roller is mounted on the cheese cutter. The roller is suitable for being mounted on existing cheese cutters, is preferably made from a plastic material or a metal.
