Abstract (en)
[origin: WO0162845A1] The invention relates to a shaped body comprising cellulose having a crystallinity index of < 45 %. The invention also relates to a shaped body comprising cellulose with a proportion of cellulose IV of at least 50 %. The shaped body can contain, as an additive, a material based on marine plants and/or shells of marine animals. This shaped body can be used as packaging material or as fiber material, in the form of fiber material as a mixing constituent for producing yarns as well as in the form of fiber material for producing nonwovens or wovens.
