Abstract (en)
[origin: WO0161098A3] The carriers (2) which are formed as a single piece in the drum casing (1) are covered by reinforcement plates (6) following the line of the casing. Said reinforcement plates extend over the entire length of the axial dimension of the drum casing (1). The reinforcement plates (6) are attached to the drum casing (1) in each of their outer edge regions (7) by means of several rivet-type connections (4).
