Abstract (en)

[origin: WO0153910A2] A computer supported system especially configured for users to easily coordinate or harmonize apparel before making a purchasing decision. The embodiments include a body profile generating, encoding and decoding system. The system defines a display region configured for displaying the personalized real human facial image of a user combining the visual image of a selected garment. The shape and size of the garment is faithfully adjusted in accordance to the body profile coding parameters of the garment. The database representing the facial images of users is shared by different stores.
