Abstract (en)
[origin: WO0143049A1] The present invention provides a charnel house management system comprising a plurality of clients, and a charnel house server having a members information database connectable by the clients through on-line for storing various information, wherein a family or relation in foreign countries or remote locations attends a funeral or an ancestor worship by connecting a charnel house server using Internet, or performs an image conversation with other relations, and periodically obtains various information on the funeral or ancestor worship.
