Abstract (en)

[origin: EP1258328A2] Tool for processing workpieces (1) made of wood, plastic, etc. comprises a surface cutter (2) and at least one plane head (4) with a cutting knife. The tool has at least one further surface cutter (3) which is adjustably positioned on the plane head relative to the first surface cutter. Preferred Features: The plane head has at least one axial guide for the further surface cutter. The axial guide is a fitting groove in the surface of the plane head. The further surface cutter engages in the fitting groove with a fitting tongue (25).
