Abstract (en)
[origin: EP1258586A2] The fittings for a two-part furniture flap (9), with an upper (10) and a lower (11) section, have a swing mechanism (18) to link the body (2) of the furniture with the upper flap section. A spring (28) holds the flap in the closed position, which can be opened by overcoming its dead point setting. The lower flap section is connected to the upper section by a hinge (13) where it cannot swing alone away from the interior (7) of the furniture, but is otherwise free.
