Abstract (en)
[origin: WO0162128A1] Hub (1) for a display unit comprises a main body (2) of molded plastics material with arcuate surfaces (3 to 6) which co-operate with the surfaces on hub clamp (7). Clamp (7) is held against body (2) by screw (8) which passes through central aperture (9) in body (2) and screws into clamp (7). Bar (11) of the strut end portion (or tube end) (12) is held between surfaces (4 and 4') such that it can freely rotate; the bar (11) of strut end (13) is likewise held in surfaces (5).
