Abstract (en)

[origin: WO0164290A1] The invention relates to a mixing chamber for producing compressed air foam for extinguishing devices for fighting fires. Said mixing chamber comprises a compressed air inlet, an extinguishing agent inlet and a compressed air foam outlet. The invention is characterised in that the contour of the mixing chamber tapers towards the compressed air foam outlet. The invention also relates to a fire extinguishing device comprising an extinguishing agent container, a connecting device for connecting to a source of compressed air; and an inventive mixing chamber.
