Abstract (en)

[origin: WO0163036A1] The invention relates to a method for the crease resistant finishing of cellulose-containing textiles by treating the textiles with aqueous dispersions of C14 to C22 alkyl ketene dimers serving as finishing agents and by drying the treated textiles. The invention also relates to laundry post-treatment agents which contain, as an aqueous dispersion, 0.1 to 40 wt. % of a C14 to C22 alkyl ketene dimer, 0.1 to 50 wt. % of at least one softener and, optionally, non-ionic surfactants.
