Abstract (en)
[origin: WO0165125A1] The invention relates to a nail, especially for joining upper constructions (18) and lower constructions (20) consisting of the same or different materials, comprising a shaft (14) and a tip (16) which is connected to said shaft (14). The shaft (14) of the nail consists of an unhardened steel over a considerable part of its length, while the tip (16) of the nail consists of a hardened steel.
