Abstract (en)  
[origin: DE10009831A1] Device has water lance (1) with nozzle (13) for water jet and mouthpiece (2). Lance is movably arranged with its mouthpiece on or in hatch. Jet (4) can be blown onto wall regions reachable from hatch through operating heating system (21), which carries flows of flame and/or flue gases. Lance has one sensor (12), e.g. of sound in solids, for detecting at least one water jet quality monitoring parameter. Independent claims are also included for the following: a method of operating a water lance blower.
