Abstract (en)
[origin: WO0159372A1] The invention relates to a temperature control system that consists of at least two parts, a first part (1) that thermoelectrically generates heat/cold and a second part (2) that transports the heat or cold. The inventive device is further characterized in that at least one of the two parts (1, 2) is provided with means (13, 14) for holding together the two parts.
